2.	Compared with the second half of April, there were the following changes in export deliveries: shipments via Frankfurt/Oder increased from 1,819 railroad cars to 1,895 railroad cars while shipments via Kuestrin decreased from 417 railroad cars to 209 railroad cars. The potesh fertilizer shipments dispatched via Kuestrin were bound for Foland. The volume of commercial shipments dispatched to the USSR via Frankfurt/Oder remained almost constant and thus was considerably lower than the 1953 average. Comment.
